

As a listener of K-LOVE on 96.3 and 89.9 fm, I am writing to show support for K-Love radio stations. I also regularly listen to the Air1 station of 95.3 fm. I have often remarked to friends that I am blessed to have options for my radio stations because I live in a central area. I truly enjoy having local access to music that my daughters and I can agree on and which I believe provides both entertaining and uplifting music and news. I am an active financial supporter of both stations. Having a station that I can listen to in my office online or as I travel around my community is appreciated. Both stations offer services to local residents providing concert and event info for venues which may not get much publicity otherwise. If these stations were no longer permitted to transmit signals into my area, I suppose I would just go back to listening to cd's. It still brings me the music I want but no connection to local, regional or national news or events. I appreciate your assistance in safeguarding the services offered by stations like K-LOVE and Air1 and not allowing Low Power FM stations to override their translator's service. Nora Niece
